Bridge diodes are being required to take up less space accompanying the reduced size of electronic equipment. In order to respond to these needs, Shindengen has developed a new package in offering a complete lineup of bridge diodes that can be used in a wide range of power supply environments.

**Features**

- Rectified forward current: 4A (US4KB80R), 6A (US6KB80R), 8A (US8KB80R), (with heat sink) 10A (US10KB80R), 15A (US15KB80R), 30A (US30KB80R)
- Large current capacity of 30A with compact package
- High \( I_{\text{FSM}} \) and High Voltage
- UL approved Bridge Rectifier Diodes, registered in file number E142422
- High-density mounting for improved space efficiency through the use of SIP (Single In-Line Package)

**Application**

TV, Monitor, Switching power supply, PC, Audio, Printer
